

### neXUS III™

- FOLDS LIKE NO OTHER ROLLATOR
- CONTOURED, CUSHIONED SEAT
- PATENTED CABLE-FREE BRAKING SYSTEM

The new neXus III™ is the next level in mobility. With an ultra-compact "X" folding system and state-of-the-art lightweight construction, getting the neXus III™ in and out of the car is now so much easier.

The neXus III™ has innovated the way we think about rollators! Most rollators fold from front to back, while the neXus III™ features an "X" frame design that folds from side to side, much like a wheelchair. In addition, the neXus III™ incorporates a cable-free braking system and a solid seat structure with a contoured, cushioned seat. This "X" frame design not only allows it to stand independently when folded but also ensures that it requires minimal space. With a padded back strap that can flip to allow for two-position seating, a large mesh basket for those great shopping sprees and a double bearing front fork assembly for smooth rolling, the neXus III™ brings mobility to a new stratus.

Care & Use: For indoor or outdoor use.  
 Specifications: Aluminum frame and basket with vinyl coating, handles and backrest.  
 Wheels are made of elastomere with non-corrosive aluminum parts.
